

## Upwork Study Finds 64 Million Americans Freelanced in 2023, Adding \$1.27 Trillion to U.S. Economy

December 12, 2023

**Freelancers now comprise 38% of the U.S. workforce as professionals of all ages seek flexible work models**

SAN FRANCISCO, Dec. 12, 2023 (GLOBE NEWSWIRE) -- [Upwork](#) (Nasdaq: UPWK), the world's work marketplace that connects businesses with independent talent, today released the results of "[Freelance Forward: 2023](#)," the 10th annual comprehensive study of the U.S. independent workforce. The study found that 64 million Americans performed freelance work in the past year, an all-time high, representing 38% of the entire U.S. workforce, and an increase of 4 million total professionals from 2022.

Upwork's Freelance Forward survey, a representative study of 3,000 professionals, found freelancers contributed approximately \$1.27 trillion in annual earnings to the U.S. economy in 2023. In a year where prolonged economic uncertainty has converged with the rise of new technologies such as generative AI, record numbers of the U.S. workforce are embracing skilled freelancing as an alternative to traditional career pathways.

"The data tells us that freelancing continues to play a vital role in the U.S. workforce. An increasing number of Americans are seeking greater flexibility, autonomy and earning power when it comes to their work, and they are finding it with freelancing," said Margaret Lilani, VP of talent solutions at Upwork. "Not only are freelance professionals building meaningful careers on their own terms, but they are also at the forefront of embracing new technologies, like generative AI. The survey shows us freelancers are more likely to regularly use AI tools in their work than non-freelance professionals; they are quickly understanding the importance of upskilling to augment workflows and create better outcomes for clients."

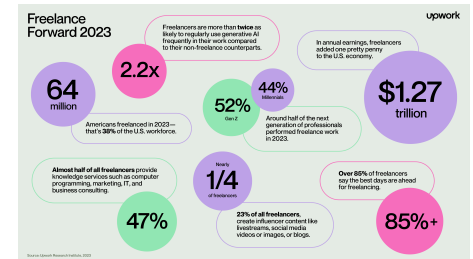

Key findings of the report include:

- **Freelancing remains a significant part of the U.S. labor market and economy:** Freelancers contributed \$1.27 trillion to the U.S. economy in annual earnings in 2023. This was a 78% increase from the estimated \$715 billion to the economy in 2014, the first year of the study.<sup>1</sup>
- **Freelancing hits a new all-time high:** The number of professionals freelancing increased to 64 million Americans, or 38% of the U.S workforce, an increase of 4 million from 2022.<sup>2</sup>
- **Freelancers are 2.2 times more likely to regularly use generative AI frequently in their work:** 20% of freelancers use generative AI tools on a regular basis (multiple times per week), which compares to just 9% of non-freelance professionals.
- **Nearly half of freelancers provide skilled knowledge services:** 47% of all freelancers, or nearly 30 million professionals, provided knowledge services such as computer programming, marketing, IT, and business consulting in 2023.
- **A quarter of freelancers are creating influencer-style content:** 23% of all freelancers, or 14.7 million professionals, created influencer content including livestream services, social media videos, images or blogs in 2023.
- **Gen Z and Millennials are the most likely to explore freelancing:** In 2023, 52% of all Gen Z professionals and 44% of all Millennial professionals performed freelance work.
- **Older Americans continue to be part of the freelance market:** In 2023, nearly 8.3 million professionals, or 13% of all U.S. freelancers, were aged 59 or above.
- **The future is bright, according to freelancers:** Over 85% of freelancers say the best days are ahead for freelancing.

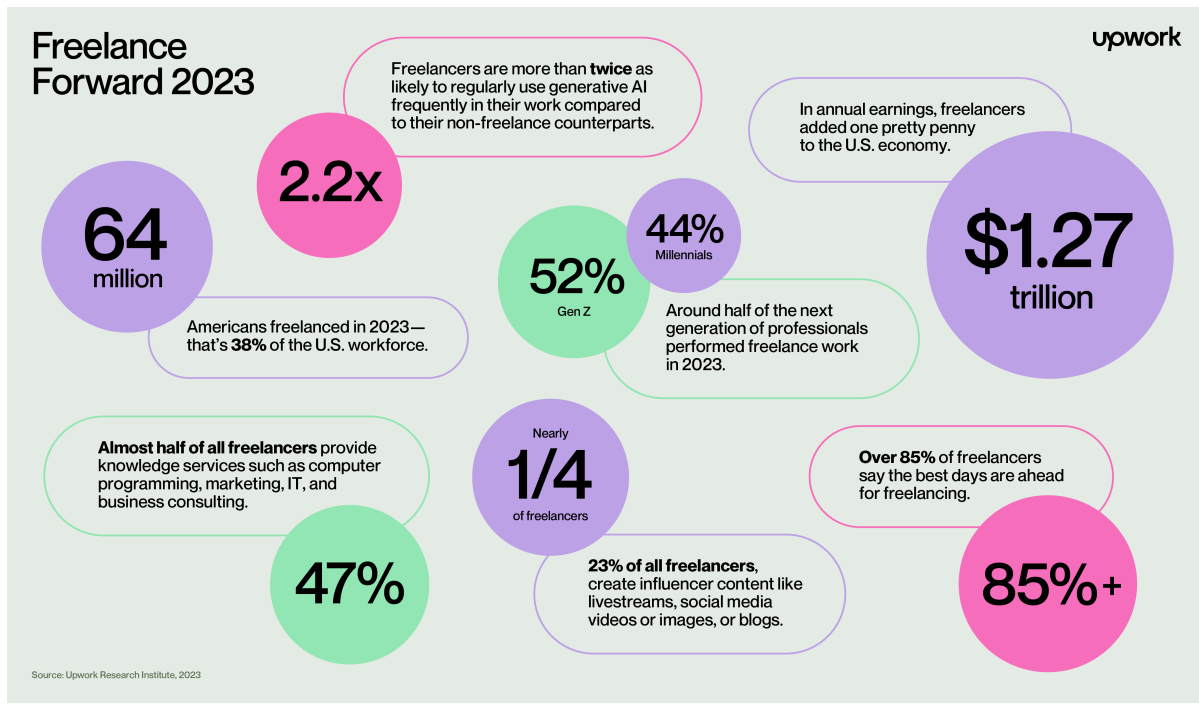

"I've been a freelancer for over ten years and it's been remarkable to witness the extraordinary ascent of the freelance economy. It's not just a trend—it's a dynamic shift in how we work and thrive," said Samer Bazzi, a full stack marketer who has freelanced on Upwork for over a decade. "It's no surprise more and more professionals are seeking alternatives to traditional 9-to-5 models in favor of flexible work arrangements because of the control it provides over one's career."
