### **Non-GAAP Financial Measures**

To supplement our condensed consolidated financial statements, which are prepared in accordance with GAAP, we present non-GAAP cost of revenue (and as a percentage of revenue), non-GAAP gross profit (and as a percentage of revenue), non-GAAP operating expenses (total and each line item, and total and each non-GAAP operating expense item as a percentage of revenue), non-GAAP income (loss) from operations (and as a percentage of revenue), non-GAAP net income (loss) (and as a percentage of revenue and on a per share basis), and adjusted EBITDA in this press release. Our use of non-GAAP financial measures has limitations as an analytical tool, and these measures should not be considered in isolation or as a substitute for analysis of financial results as reported under GAAP.

We use these non-GAAP financial measures in conjunction with financial measures prepared in accordance with GAAP for planning purposes, including in the preparation of our annual operating budget, as a measure of our core operating results and the effectiveness of our business strategy, and in evaluating our financial performance. These measures provide consistency and comparability with past financial performance, facilitate period-to-period comparisons of core operating results, and also facilitate comparisons with other peer companies, many of which use similar non-GAAP financial measures to supplement their GAAP results. In addition, adjusted EBITDA is widely used by investors and securities analysts to measure a company's operating performance. We exclude the following items from one or more of our non-GAAP financial measures: stock-based compensation expense (non-cash expense calculated by companies using a variety of valuation methodologies and subjective assumptions), depreciation and amortization (non-cash expense), interest expense, other (income) expense, net, income tax (benefit) provision, and, if applicable, other non-cash transactions.

Investors are cautioned that there are material limitations associated with the use of non-GAAP financial measures as an analytical tool. In particular, (1) stock-based compensation expense has recently been, and will continue to be for the foreseeable future, a significant recurring expense for our business and an important part of our compensation strategy, (2) although depreciation and amortization expense are non-cash charges, the assets subject to depreciation and amortization may have to be replaced in the future, and adjusted EBITDA does not reflect cash capital expenditure requirements for such replacements or for new capital expenditure requirements, and (3) adjusted EBITDA does not reflect: (a) changes in, or cash requirements for, our working capital needs; (b) interest expense, or the cash requirements necessary to service interest or principal payments on our debt, which reduces cash available to us; (c) tax payments that may represent a reduction in cash available to us; or (d) expense from our common stock warrant issued to the Tides Foundation, which is recurring and will be reflected in our financial results for the foreseeable future. The non-GAAP measures we use may be different from non-GAAP financial measures used by other companies, limiting their usefulness for comparison purposes. We compensate for these limitations by providing specific information regarding the GAAP items excluded from these non-GAAP financial measures. A reconciliation of these non-GAAP measures has been provided in the financial statement tables included in this press release and investors are encouraged to review the reconciliation.
